Parity Archive

Visual list of that years media

Click to expand media

Filterable by:

- Video Talks

- Photos

- Graphics

Outstanding Questions

Hosting

- Will we have SSH access with the ETH Server

- What versions of PHP can the server support?

Design Concerns

- It might not be easy to have some of the interactive elements overlap the stream. My first impression is that all elements in front, or all behind the stream will be easiest.

- Having the gravity "canvas" move downwards when the content changes (like when schedule is clicked in level 2 navigation) might cause undesired effects
